

Please discuss these activities with your child and support them where necessary. If you are unsure about any or need resources, please ask.

Due back before :
Friday 17th February

Seasons and Weather...

Kite Flying.....

On a windy day lots of people choose to use the wind to help fly a kite. Your task is to design and make your own kite and share it with us. You could also write instructions using imperative verbs of how you made it!

Birthday Celebrations

We need you to be birthday investigators! Ask your family and friends which month do they celebrate their birthday in? Which season is their birthday in?

Using the birthday information you have collected record your findings.

You could create a tally or bar chart.

Can you build a snowman in the summer?

During winter you can build a snowman if it snows. What clothes would you need to wear? In the summer you might go to the beach. Would you wear different clothes? Your job is to write down a list of items you would pack to go on a winter holiday and a list you would take on a summer holiday.

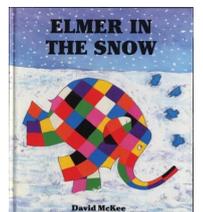

Are your lists the same?

Story Time

There are lots of fictional stories that have different weather conditions in. For example, *The Gruffalo's Child*, *Percy the Park Keeper* and *Elmer* stories have different weather conditions.

Your task is to read as many books as you can that include different weather like: rain, sun, snow, wind, ice or hail in the story. Record the title, author and weather condition that was in the story.

Millfields Weather Report

There has been lots of interesting weather conditions reported in England in the past few weeks. Have you experienced any of these yourself?

Your task is to create your own weather forecast. This could be about the real weather conditions or your own imaginative weather forecast.
