

Music

Music education at Millfields is to provide a comprehensive and inclusive program that meets the diverse needs of all learners, fosters creativity, self-expression, and cultural appreciation, while also enabling learners to acquire a broad range of musical skills and knowledge. We ensure that music is accessible to all learners, including those with SEND.

Our music curriculum encompasses a range of different musical activities, including singing, playing instruments, composing, and performance. Children are given opportunities to perform and create their own music, both as individuals and as part of ensembles.

Children are introduced to a range of musical styles and cultures, developing their cultural understanding and appreciation. The program promotes creativity and self-expression.
